Jaideep Tripurani

Software Engineer @ Walmart | Java • Spring Boot • React • AWS • AI/ML • Python | MS CS @ UNT |
Chicago, Illinois, United States

Summary

Software Engineer with 2+ years of experience building enterprise-scale Java and Python applications at Walmart. I specialize in full stack development Spring Boot microservices on the backend, React.js on the frontend, REST APIs, Kafka, PostgreSQL, MongoDB, and AWS cloud deployments. Recently completed my MS in Computer Science at the University of North Texas (GPA 3.8, May 2025) and actively seeking full-time Software Engineer roles across the US. Core stack: Java • Spring Boot • Python • React.js • Node.js • AWS • GCP • Azure • Docker • Kubernetes • Kafka • PostgreSQL • MongoDB • LangChain • GitHub Copilot Beyond backend services, I build Python automation scripts and data pipelines that reduce manual operational work from infrastructure provisioning to workflow orchestration. I'm also familiar across all three major cloud platforms (AWS, GCP, and Azure), which lets me adapt quickly to different infrastructure environments. I'm drawn to roles where technology solves real problems whether that's in enterprise software, media, e-commerce, government tech, or AI-integrated platforms. I write blogs occasionally on geopolitics and tech, and I follow global events closely which is why mission-driven companies genuinely appeal to me. Open to full-time roles and contract opportunities. Reach me at jaideeptripurani10@gmail.com

Experience

Walmart
Full-stack Developer AI/ML
October 2025 - Present (9 months)
United States

Tekbon Inc
Software Engineer
November 2022 - July 2023 (9 months)
Hyderabad

IFORTIS WORLDWIDE™
Sales And Marketing analyst
June 2021 - August 2021 (3 months)
India

Areksoft Technologies Private Limited
Web Development Intern
May 2021 - July 2021 (3 months)
India

- > Gained expertise in HTML, CSS, and JavaScript, leading to creating responsive, interactive web pages that enhanced user functionality.
- > Collaborated with a team to develop a recipe web page, reducing project delivery time by 30% and improving team productivity through effective communication and project management.
- > Spearheaded the design of an innovative recipe search tool, increasing user engagement by 20% through UI optimization and functionality enhancements.

Education

University of North Texas
Master of Science - MS, Computer Science · (August 2023 - May 2025)
