

JAIDEEP TRIPURANI

Chicago, IL 📍 (346)-236-5831 ✉ jaideeptripurani10@gmail.com 🔗 LinkedIn 🐙 GitHub

Professional Summary

Java Full Stack Engineer with **2+ years** of professional experience building scalable **Spring Boot** microservices, **Python** services, **React.js** frontends, and **REST APIs** across enterprise and product environments. Delivered backend systems handling **1M+ daily transactions** at Walmart with **99.9% uptime**, and built full stack product features at Teckbon Inc supporting **50K+ users**. Strong depth in **PostgreSQL** and **MySQL** schema design, **SQL optimization**, **Hibernate/JPA**, and **microservices architecture**. Deployed production applications on **AWS** using **Docker**, **Kubernetes**, and **CI/CD** pipelines via **GitHub Actions** and **Jenkins**. Brings **GenAI** as an added differentiator — integrated **LangChain**, **OpenAI API**, and **hybrid search pipelines** into enterprise backend workflows. M.S. in Computer Science, University of North Texas (May 2025).

Work Experience

Java Full Stack Engineer — Walmart

Contract · W2

Oct 2025 – Present

vendor:Iconsoft Inc

- Engineered **Java Spring Boot** REST microservices for an enterprise **vendor management platform** — resolved a critical **N+1 query problem** in supplier onboarding by refactoring **Hibernate ORM** fetch strategies and connection pool tuning, reducing **API response latency by 30%** across endpoints serving **1M+ daily transactions**.
- Diagnosed a **PostgreSQL** bottleneck where vendor compliance queries were timing out — redesigned schema with **composite indexes** and rewrote nested subqueries as **CTEs**, improving **query performance by 25%** across procurement data layers.
- Built **Python FastAPI** microservices for vendor document parsing and field extraction — reduced manual data entry effort by **40%** across procurement operations.
- Integrated **third-party supplier APIs** for real-time compliance verification and shipment tracking — built resilient clients with retry logic and circuit breakers across **3 external data providers**.
- Built **React.js** vendor dashboards and supplier portals integrated with **Spring Boot REST APIs** — implemented **Redis** caching reducing database read load by **35%** with **99.9% uptime**.
- Integrated **LangChain** and **OpenAI API** into backend services — built **hybrid search pipelines** combining **BM25** and **dense vector retrieval** to automate **25%** of recurring vendor policy lookup workflows.

Java Full Stack Developer — Teckbon Inc

Full-Time

Jul 2022 – Jul 2023

Hyderabad, Telangana, India

- Built full stack applications using **Java Spring Boot**, **React.js**, and **MySQL** — delivered product features supporting **50K+ users** with secure **REST API** endpoints across client-facing and internal platforms.
- Designed **MySQL** schemas and optimized queries through indexing and stored procedures — improved **query performance by 30%** on data-intensive backend services.
- Wrote **JUnit** and **Mockito** unit and integration tests for **Spring Boot** services — improved code reliability and reduced post-release defects across backend modules.
- Maintained **CI/CD pipelines** using **Jenkins** and **Git** — automated build and deployment workflows reducing release cycle time by **35%**.

Projects

AI Support Triage Agent | *Python, LangChain, FAISS, GPT-4o, React.js, AWS* | May 2026

- Built a multi-domain agentic RAG chatbot (HackerRank Orchestrate — top **100 of 3,000**) in **18 hours** — serving **3 companies** with query decomposition, cross-encoder reranking, emotional distress detection, automated human escalation, and rules-based guardrails; deployed on **AWS**.

Technical Skills

Java & Spring Boot: Java, Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, OOP, Design Patterns, Multithreading, Collections, JWT, OAuth2

Python: Python, FastAPI, LangChain, Automation Scripts, Data Processing Pipelines

Frontend: React.js, Angular, JavaScript, TypeScript, HTML, CSS, Responsive Design, REST API Integration

SQL & Databases: PostgreSQL, MySQL, Oracle SQL, MongoDB, Redis

REST & Microservices: REST APIs, Microservices Architecture, FastAPI, Event-Driven Architecture, API Gateway, Service Mesh, Spring Cloud

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, API Gateway, CloudWatch), Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, Maven, CI/CD

Testing & Quality: JUnit, Mockito, Unit Testing, Integration Testing, Code Reviews, Agile/Scrum

GenAI & RAG: LangChain, OpenAI API, GPT-4o, FAISS, Hybrid Search, BM25, Dense Retrieval, Prompt Engineering, Agent Orchestration

Education

University of North Texas

Master of Science in Computer Science | GPA: 3.8

Denton, TX

May 2025
